

Quality Policy
Validation and Verification Body (VVB)

Management System Certification Institute (Thailand) (MASCI) aims to provide certification services according to ISO standards and other system standards, to enhance the efficiency and quality of Thai industries, to enhance the national certification capability to a level equal to other countries, and to develop qualified personnel in both the public and private sectors to meet international standards and sufficiently support work at the international level. To achieve the goal, MASCI determines its Quality Policy of validation and verification activities for Greenhouse Gas Services as follows:

“Management System Certification Institute (Thailand) (MASCI) provides greenhouse gas (GHG) validation and verification services which has committed to serve services in a reliability, independence, transparency, safeguarding impartiality, safeguarding confidentiality of information, following related legal requirements, international standards and other requirements, and developing knowledge and competency of personnel for validation and verification activities. MASCI supports public, private sectors and related stakeholders in order to enhance the competitiveness and sustainable development including continual quality improvement.”
